SAFETY FEATURES

To ensure maximum safety on every journey, the Corolla Altis 1.8L is equipped with a front SRS airbag that is designed to deploy in the unlikely event of an accident.

Brake System Enhancement
Larger master cylinder piston diameter, specially tuned brake booster, and high rigidity brake hoses help ensure brake controllability and effectiveness.

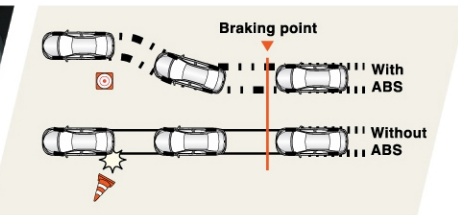

- 1. Tilt & Telescope Steering Wheel
- 2. Power Mirror Control
- 3. 5-Speed Manual Transmission
- 4. Side Mirrors with Turn Signal
- 5. MID
- 6. Body Coloured Mudflaps
- 7. In-Dash Audio System
- 8. Immobilizer

Pretensioner with Force Limiter
During impact the pretensioners along with the seat belts enhance restraint performance, holding in place the passenger with just the right amount of pressure.

Emergency Locking Retractor (ELR)
The Emergency Locking Retractor (ELR) allows the seat belts to freely extend and retract with occupant movement, yet locks the belt during a sudden stop or upon impact.

ABS and EBD
The Anti-lock Braking System (ABS) prevents skidding when braking in wet and slippery conditions. Electronic Brake Distribution (EBD) ensures brake-force is distributed optimally between all wheels for effective braking.
